

NaviSleep Dental Sleep Medicine Partnership Packages

Foundational Package

Best For: Clinics new to sleep, starting with education and screening only

What's Included:

- One-hour live or virtual team education session
- One-year access to Basic Sleep Health Education content
- Use of NaviSleep's validated patient screening tool
- Simple patient referral using **NaviSleep's SDB referral form**
- Patients complete a 7-night home sleep study with virtual consultation by a sleep expert
- NaviSleep provides **treatment pathway navigation**, referring patients to the most appropriate therapy provider (e.g., OAT, CPAP, or OMT)

Ideal for: Educating your team and introducing patients to sleep health without managing devices or treatment in-office

Basic Package

Best For: Clinics ready to screen and support in-office sleep diagnostics for their patients

What's Included:

- Two-hour live or virtual team education session (includes expanded airway screening and clinical workflow training)
- One-year access to extended Sleep Health Education content
- Use of **NaviSleep's SDB screening tool**
- **NaviSleep sleep testing device provided to the dental clinic to facilitate seamless testing for their patients**
- NaviSleep manages Rx and insurance pre-authorizations as needed
- Patients complete a 7-night home sleep study followed by a virtual consultation with a sleep expert

Ideal for: Clinics looking to offer sleep screening and coordinate testing directly from their practice—without taking on treatment responsibilities

Intermediate Package – Collaborative OAT Partner

Best For: Clinics that manage Oral Appliance Therapy (OAT) but want support with diagnostics, consultations, and medical communication

What's Included:

- Use of **NaviSleep's SDB screening tool**
- Inclusion of **NaviSleep's patient-facing marketing material** to support clinic-based awareness and engagement
- Shared access to patient records for collaborative care
- Patients complete a 7-night diagnostic study with sleep physician interpretation and virtual consultation
- Post-titration virtual follow-up consultation provided by NaviSleep
- Communication of findings and treatment outcomes sent to the patient's primary care provider
- Support with structured OAT titration protocols and documentation workflow
- **Support in bridging the gap between dental and medical communication**

Ideal for: OAT providers who want support with diagnostics, medical loop closure, and admin infrastructure

Comprehensive Package – Full DSM Implementation

Best For: Clinics ready to fully integrate Dental Sleep Medicine into their practice with a structured, in-person team approach

What's Included:

- **Half-day DSM implementation training** delivered live, focused on foundations, patient care pathways, and workflow management
- Access to NaviSleep's **sleep diagnostic platform** and **sleep diagnostic devices**
- Training on structured OAT titration protocols and NaviSleep's tracking systems
- Access to shared patient records for collaborative documentation and communication with medical providers
- Use of NaviSleep's SDB referral form and onboarding materials

- Inclusion of **NaviSleep's patient-facing marketing material** to support clinic-based awareness and engagement
- Ongoing administrative and clinical support to ensure successful long-term integration

Ideal for: Dental clinics launching a full-scope DSM program and seeking hands-on implementation, clinical systems, and marketing support from a trusted diagnostic partner
